

# DocWagon™ assessment cheat sheet

## Scene Size-Up

- **Scene Safety** Is the scene unsafe? If so, what can you do to make it safer?
- **Body Substance Isolation** Apply gloves, consider masks, goggles and gowns.
- **Location of All Patients** Consider the possibility of some patients not being immediately apparent, and find them.
- **Mechanism of Injury \ Nature of Illness** See what you can determine about the problem from across the room by regarding the patient's condition, evidence lying around, and bystander reports.

## Initial Patient Assessment

- **Level of Consciousness** Alert? Responsive to Voice? Responsive to Pain? Unresponsive?
- **Airway, Breathing, Circulation** Is the patient's throat blocked? Is the patient breathing? Does the patient have a pulse, and is there significant bleeding?

## Focused History and Physical Exam

- **Baseline Vital Signs** Pulse, Respirations, Blood pressure, Blood oxygen saturation, Blood glucose, etc.

### • SAMMMPLE History

- S** igns and Symptoms (inspect patient, "Can you tell me what's wrong?")
- A** llergies ("Do you have any allergies you know about?")
- M** edications ("Are you taking any medications?")
- M** agic ("Are you magically Awakened?")
- M** odifications ("Have you had any cyberware or bio implants installed?")
- P** ertinent Past History ("Has anything like this ever happened to you before?")
- L** ast Oral Intake ("When was the last time you had something to eat?")
- E** vents Leading Up ("Tell me what happened.")

- **Rapid Assessment** Check patient from head to toe. Remove clothing as necessary.

## Treat & Transport
